

Podnośnik nożycowy Bestlift N30WP

Electro-hydraulic 4-cylinder scissor lift. Bestlift N30WP is designed to be installed on the floor (height when folded only 105 mm.) Its design makes it very easy to use and does not take up much space. It also does not require any construction works, as it is installed on the floor.

Main features:

- Fully automatic control from the control box
- Designed for installation on the floor.
- Lifting system based on actuators.
- Hydraulic safety devices in case of sudden oil leakage.
- Sensors of the extreme and safe position of the platforms. final descent phase sound.
- Durable powder coating of elements
- CE certificate

Dane techniczne:

- | | |
|------------------------|-----------------|
| • Lifting capacity: | 3000 kg |
| • Power: | 400V, 50 Hz |
| • Motor: | 2,2 kW |
| • Lifting Height: | 1850 mm |
| • Folded height: | 105 mm |
| • Platform length: | 1450 - 2050 mm |
| • Platform width: | 635 mm |
| • Lifting time: | 55 s |
| • Noise level: | 70 dB |
| • Working temperature: | -10 do + 40 ° C |
| • Weight: | 760 kg |
